09/15/2021, 23:02 - Roni Pavon Cohen : What about this game plan:

During the Friday AMA Alex presents some statistics about how our interest payments grow the last years parallel with AUM and so on and .. ad hoc during the AMA he introduces the BB&B (buy back and burn) and has someone with him on the show that executes in real-time the burn

(To burn ERC20 you just need to execute a simple blockchain transaction)

This way our community can see in real-time that we really did what we said.

And from there on my team can send every Friday the same time the exact amount to a designated burning wallet or how ever we agree to structure it to make sure it's executed every Friday same time (interest calculation is Friday morning..)
